

Looking at a career in Engineering or Information Technology then take a look at this wonderful opportunity...

Coleambally Irrigation Co-operative Ltd (CICL) in conjunction with the Country Education Foundation of Coleambally-Darlington Point is offering scholarships for students studying Engineering or Information Technology in 2022. The students need not necessarily be in the first year of their course.

The students would apply for CEF CDP education grant for 2022 and if successful in being awarded a CICL Grant Latta Bonded Scholarship will be funded by CICL on the following basis:

- If the recipient is a first year student, they will receive \$5 000 for that year, increasing to \$7 500 per year for the remainder of the course.
- If the recipient is a second (third or fourth) year student, they will receive \$7 500 for that year and the remainder of the course.

The recipient will receive their scholarship funds through CEF CDP on the provision of invoices or receipts for expenses relating to their study – for example, accommodation, text books, specialist equipment, travel etc but not course fees.

The recipient would be required to work for CICL for a period of time during the main summer and winter vacations each year. They would be paid for this work. The successful applicant would be required to work for CICL post-graduation for a period of three years (dependent on whether they receive the scholarship from their first year.) If the recipient chooses not to work for CICL or leave during the three year period, he/she would be required to refund the scholarship or a portion thereof.

The recipient can study at any university he/she chooses. The student would be required to make satisfactory progress throughout the course.

These CICL Bonded Scholarships are a wonderful opportunity for a young person wishing to pursue a career in Engineering or Information Technology.

Applications at www.cef.org.au

Applications open 1st September 2021 and close 30th November 2021
